**Subject:** Microsoft anti-trust + redhat

I feel as if Redhat is doing the right thing in further reducing the monopoly of microsoft and allow microsoft to provide the hardware that these low-budget schools really need. Without the internet support, many schools today are lacking outside knowledge and a strong resource to work upon.. The internet is growing largely, and so are computers.. Have microsoft provide the software that they need and redhat will be true on their promise, as they have never let any of us down!

Kevin Bisneau  
-Proud user of RedHat linux, and Microsoft Windows 98
